

TELLURIDE HELITRAX

---

GUNNISON RIVER FARMS

AVIATION EDITION

The premiere benefit of General Aviation is utilizing your aircraft to access experiences directly, with minimal distraction once reaching your destination.

Allow me to take this opportunity to introduce two experiences that were created to accommodate pilots.

Both Telluride Helitrax and Gunnison River Farms were designed to compliment the unrivaled privilege of General Aviation.

*~Todd Herrick, Pilot/Owner*

Helitrax, based at the the Telluride Airport, will meet you at your aircraft with an Astar B-3 ready to take you to over 200 square miles of skiing terrain. Once your day is completed, we can either return to your aircraft, or land at our exclusive heli-pad, slope side of the ski area at the base of the Peaks Resort and Spa.

Gunnison River Farms is a working organic farm that is also the staging area for our adventure center. We offer float fishing trips through the Gunnison Gorge or family rafting adventures. The farm is a destination in and of itself with swimming ponds, paddle boarding, cabins and a farm to table dining experience. The property has a dirt airstrip on site, or the Delta, Co. airport, AJZ, is 8 miles away. We offer a complimentary shuttle to both.

Having spent the better part of the last 20 years running businesses and researching fly-in destinations, I can attest that nowhere else in the Lower 48 balances authentic adventure with the benefits of being a pilot.

Please let us know if we can answer any questions, or help book your next adventure.

We look forward to hearing your call sign over the radio next season!
